

Experienced nurse specialists managing the complexities of Chronic Kidney Disease.

- Program Highlights -

Dedicated chronic kidney case management specialists interact with members and families, offering a complete support network

Extensive patient education and support program helps members achieve and maintain a healthier lifestyle, thereby reducing future medical costs

Early identification and support for dialysis and transplant needs

Member assistance with Medicare eligibility and enrollment for dialysis treatments

Network steerage to in network facilities

In 2015, more than 661,000 Americans suffered from kidney failure. Of these, 468,000 individuals were on dialysis and approximately 193,000 lived with a functioning kidney transplant (United States Renal Data System, 2015).

American Health's comprehensive Chronic Kidney Disease (CKD) Case Management solution provides support to all members facing a gradual loss of kidney function. American Health's experienced CKD specialty team offers an expert approach to patient care, ongoing support and generates cost savings to clients.

With more than 10 years of experience on average, our CKD case managers work with the member, the member's family and support network to provide comprehensive assistance in all areas related to ongoing education, medical history, medications, development of support systems, lifestyle changes and behavior modifications, and financial options.

Savings are achieved through medical necessity reviews, early identification, averted complications through member education, steerage to alternate care settings and member assistance for enrollment in dialysis.

Comprehensive Chronic Kidney Disease program that supports members at all stages of CKD to improve quality of life while reducing plan costs.
