

URAC-accredited Utilization and Case Management services provided at your location

American Health's Onsite Medical Management program provides clients and their employees with direct access to a medical management team, enabling them to better understand and manage their health care. We offer flexible programs and services that meet the individual needs of each client. Onsite Medical Management services provide clients many opportunities for cost savings generated via access to American Health's accreditations, licenses, guidelines and iSuite system.

American Health assumes ongoing recruiting, training and continuing education of nurses and other staff. Our model allows customers to present onsite, full medical management capabilities while obtaining the following support, expertise and services:

- URAC-accredited program
- Designated account executive and field director
- Best-practice guidelines, policies and procedures
- Total Quality Management, including staff operational audits
- HIPAA and Department of Labor compliance
- Licensure procurement
- Disaster/business recovery program
- Medical director and panel of board-certified, practicing physicians
- Potential for backup and overflow from American Health's offices
- Preferred status with multiple reinsurance carriers, resulting in deeper discounts

Provides savings to medical management programs by lowering administrative costs and improving operational efficiencies

- Program Highlights -

Opportunities for significant savings on accreditation and system fees

A comprehensive program that allows clients to focus on their primary business while offering the highest quality care management products in-house

Opportunity to private label services

EZ Reports and EZ Access provide clients with direct access to electronic reporting options and case detail
